P.112 - **P.**113 **TERMS & CONDITIONS**
The fine print.

P.114 - **P.**115 **BESPOKE DOORS**
Any door, any size.

THE DEANTA DIFFERENCE

THE DEANTA STORY

Deanta Doors is a 100% Irish owned company that designs and manufactures its own range of real wood veneered interior doors, frames, skirting and architrave. Our innovative designs have set the standard in modern and contemporary internal doors. We are driven by three simple ideals, delivering a quality product, excellence in customer service & a determination to continue innovating and leading the field in interior doors.

We manufacture and supply to the trade a wide range of beautifully crafted stylish interior doors including oak, walnut and white primed doors along with a selection of FD30 fire doors. Our Fire doors are Certified and manufactured to safety standard BS 476: Part 22: 1987 by Certifire: Warringtonfire Certification. All Deanta doors are manufactured to the highest standard with only the finest of materials ensuring you get the best from your contemporary Deanta door.

We truly care about the experience our customers have with us. We welcome feedback and continually strive to deliver unsurpassed customer care. Deanta has over twenty-five years of experience in the building and design industry which we believe is fundamental in creating strong, working relationships with our clients who are suppliers to the construction industry, designers, architects, builders & the general public.

OUR COMMITMENT TO QUALITY

As with the “voice of the customer”, customer satisfaction is Deanta’s highest priority. We achieve this goal by listening to our customers and by focusing on innovation while continuously improving the cost effectiveness as well as the performance of all our products and processes. Unlike most other Irish door companies, we have our own manufacturing facility. This allows us not only to control our supply chain but quickly respond to customer feedback. With full ownership of the quality control process we seek to ensure every door that leaves our factory is of the very highest quality. Owning the process from production to distribution enables us to be extremely competitive on price, as well as surpassing expectations on service while permitting the flexibility to have doors manufactured to meet your specification.

DOOR ACCESSORIES

déanta

HARDWARE

The Range of Deanta Door Accessory Sets has been exclusively chosen to complement our doors. The Aran, Lagan, Barrow, Inishmore & Skellig Range can come in both standard & bathroom sets, which include:

1 x Pair of Handles, 3 x Hinges,
1 x Pair of Escutcheons & 1 x Lock with 2 x Keys.

All Sets are Available in both Chrome Plated & Satin Nickel Finishes, As well as multiple other finishes available for example Black Graphite, Stainless Steel & our new range of Antique Brass.

FIRE DOORS

deanta

FD30

certifire

As part of our commitment of being a one-stop shop for customers' door needs, we offer our own patented fire doors.

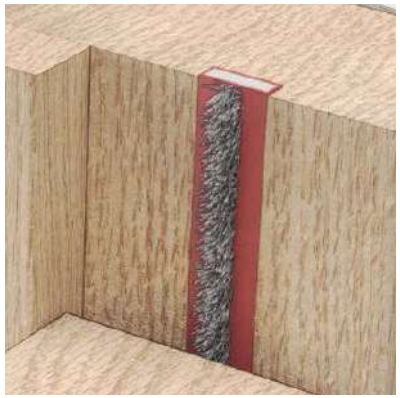
These doors have been extensively tested and accredited by Certifire and satisfy all the safety needs required, so you can be confident that your home and family are protected.

Deanta's FD30 Fire Doors are rated to give 30 minutes of fire protection.

Glass Intumescent Fire Seal

Glazing Panels, Intumescent fire resistant seals are also used as part of a glazed system which secures the seals, Fire rated glass to be installed also available from suitable glazers.

GLASS INTUMESCENT FIRE SEAL
Intumescent glazing gasket



Glass Intumescent Fire Seal

Door Gap must be between 2mm - 3mm. Intumescent Fire seals must be inserted to the frame, a combined smoke and fire seal is best recommended commonly known as a Brushed Seal.

SS / BRUSHED SEAL
fire + smoke seal

CONTRACT DOORS déanta

Contract Doors are made with your budget in mind.

Contract Doors are the same design as Solid Core Doors, however our contract door core is made from a lighter core tubular or sectional material particle board, that is not Fire Rated. The face of the door is veneered. Then we cut the V groove out of the face which is MDF (Medium-Density Fibreboard).

The MDF is stained to a matching colour oak or walnut. The whole process is more economical and so we can offer you a more competitive price.

All Deanta Contract Doors are available in full fire-rated versions.

SOLID CORE DOOR

solid wood inlay, v-groove sanded

CONTRACT DOOR

MDF face, v-groove sanded, stained to tone with wood

EASY-FIT

deanta

Deanta Doors have a new innovative range of Easy-Fit Skirting & Architrave available in White Primed.

SKIRTING:

Excess plaster gathering in the corners, with the chamfer at the bottom of our easy fit skirting, this is no longer an issue.

ARCHITRAVE:

Sometimes the plaster and door frame might not line up, with the 70mm x 2mm rebate at the back of the architrave you will get a smoother finish every time.

PRIMED CORNER BLOCKS

Corner Blocks are an innovative way to add a stylish finish to architrave. All Deanta's Range of Primed Corner Blocks have been primed & then sanded, before an undercoat is applied.

The Corner Blocks are then fine-sanded so the painter only needs to provide a final colour chosen by the clients. This will save a considerable amount of time & expenditure for the developer.

ADJUSTABLE DOOR FRAMES & CASINGS

Our removable stop frames and adjustable door casings (frames and architraves) have been specially designed to make life easier for you. Choosing one of our adjustable door casings means that installation is a breeze, and one of our kits will fit just about any wall you have in your home.

These casings simplify the process of fitting door frames and architraves and give a wonderful finish with moulded and shaker style architrave

Adjustable frames available in 98mm and 125mm versions in Oak or Walnut, Half Splayed (oak only), Shaker or Moulded Adjustable Architrave.

STANDARD DOOR FRAME

Our standard door frame features a removable stop allowing you to cover installation markings on the main frame giving a clean and professional finish. Our door frames are solid engineered timber with a veneer wrap finish and is also available as solid engineered oak with veneer.

Frames can be grooved out to accommodate an intumescent strip for making a fire frame when using DEANTA fire doors. They may also be suitable for other fire doors, but before proceeding please make sure to check the certification first. Our frames are made from Finger jointed Fir and faced with MDF adding stability to our frames (Frames to be fitted after plastering is completed and dry only).

EDWARDIAN WALL PANELLING

Revamp your room with our simple, elegant and affordable "Edwardian" wall panelling. Not only is "The Edwardian" wall panelling inexpensive and can save you considerable time, it is also easy to install, complementing the Deanta range of quality doors, skirting, architrave and door hardware.

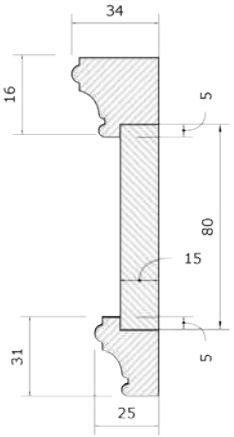
Single pack of wall panelling comes with:

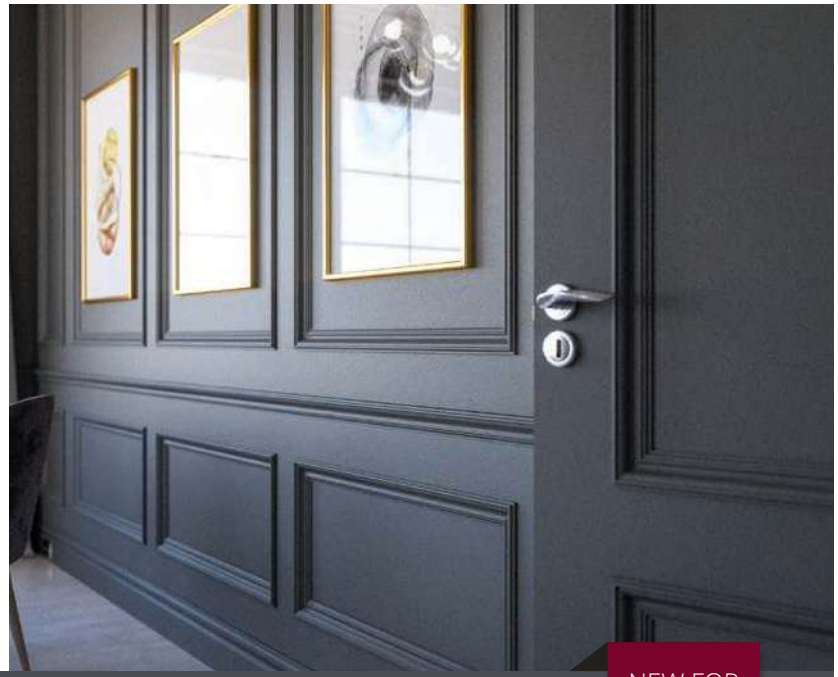
1 x (2400mm x 34mm x 31mm) length of large (top) beading

4 x (2400mm x 80mm x 15mm) lengths of board panelling

4 x (2400mm x 25mm x 31mm) lengths of (inside) beading

For further information visit our website at: **www.deantadoors.ie** or please contact your local stockist.





WR2 WALL PANELLING

NEW FOR
2021

Launching in April 2021, the WR2 Wall Panel is the must have for this year. Inspired by the WR2 Door this panel is both stylish and elegant in its form and will make a huge statement in any room. The WR2 Wall Panel is inexpensive and easy to install and compliments the full range of Deanta products.

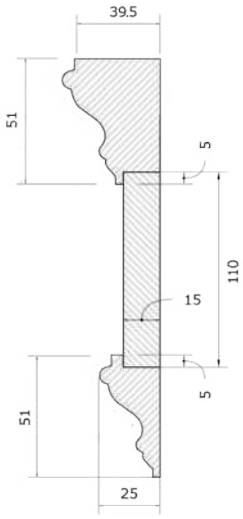
Single pack of wall panelling comes with:

1 x (2400mm x 39.5mm x 51mm) length of large (top) beading

4 x (2400mm x 110mm x 15mm) lengths of board panelling

4 x (2400mm x 25mm x 51mm) lengths of (inside) beading

For further information visit our website at: **www.deantadoors.ie** or please contact your local stockist.



BEING RESPONSIBLE

We have sensor lighting throughout our site to ensure that no power is wasted when not in use.

98% of all our onsite waste is recycled.

We use mains water dispensers to reduce the use of plastic bottles and help the environment.

Solar panels on the roof of our building create enough energy to make our building self-sustainable for seven months.

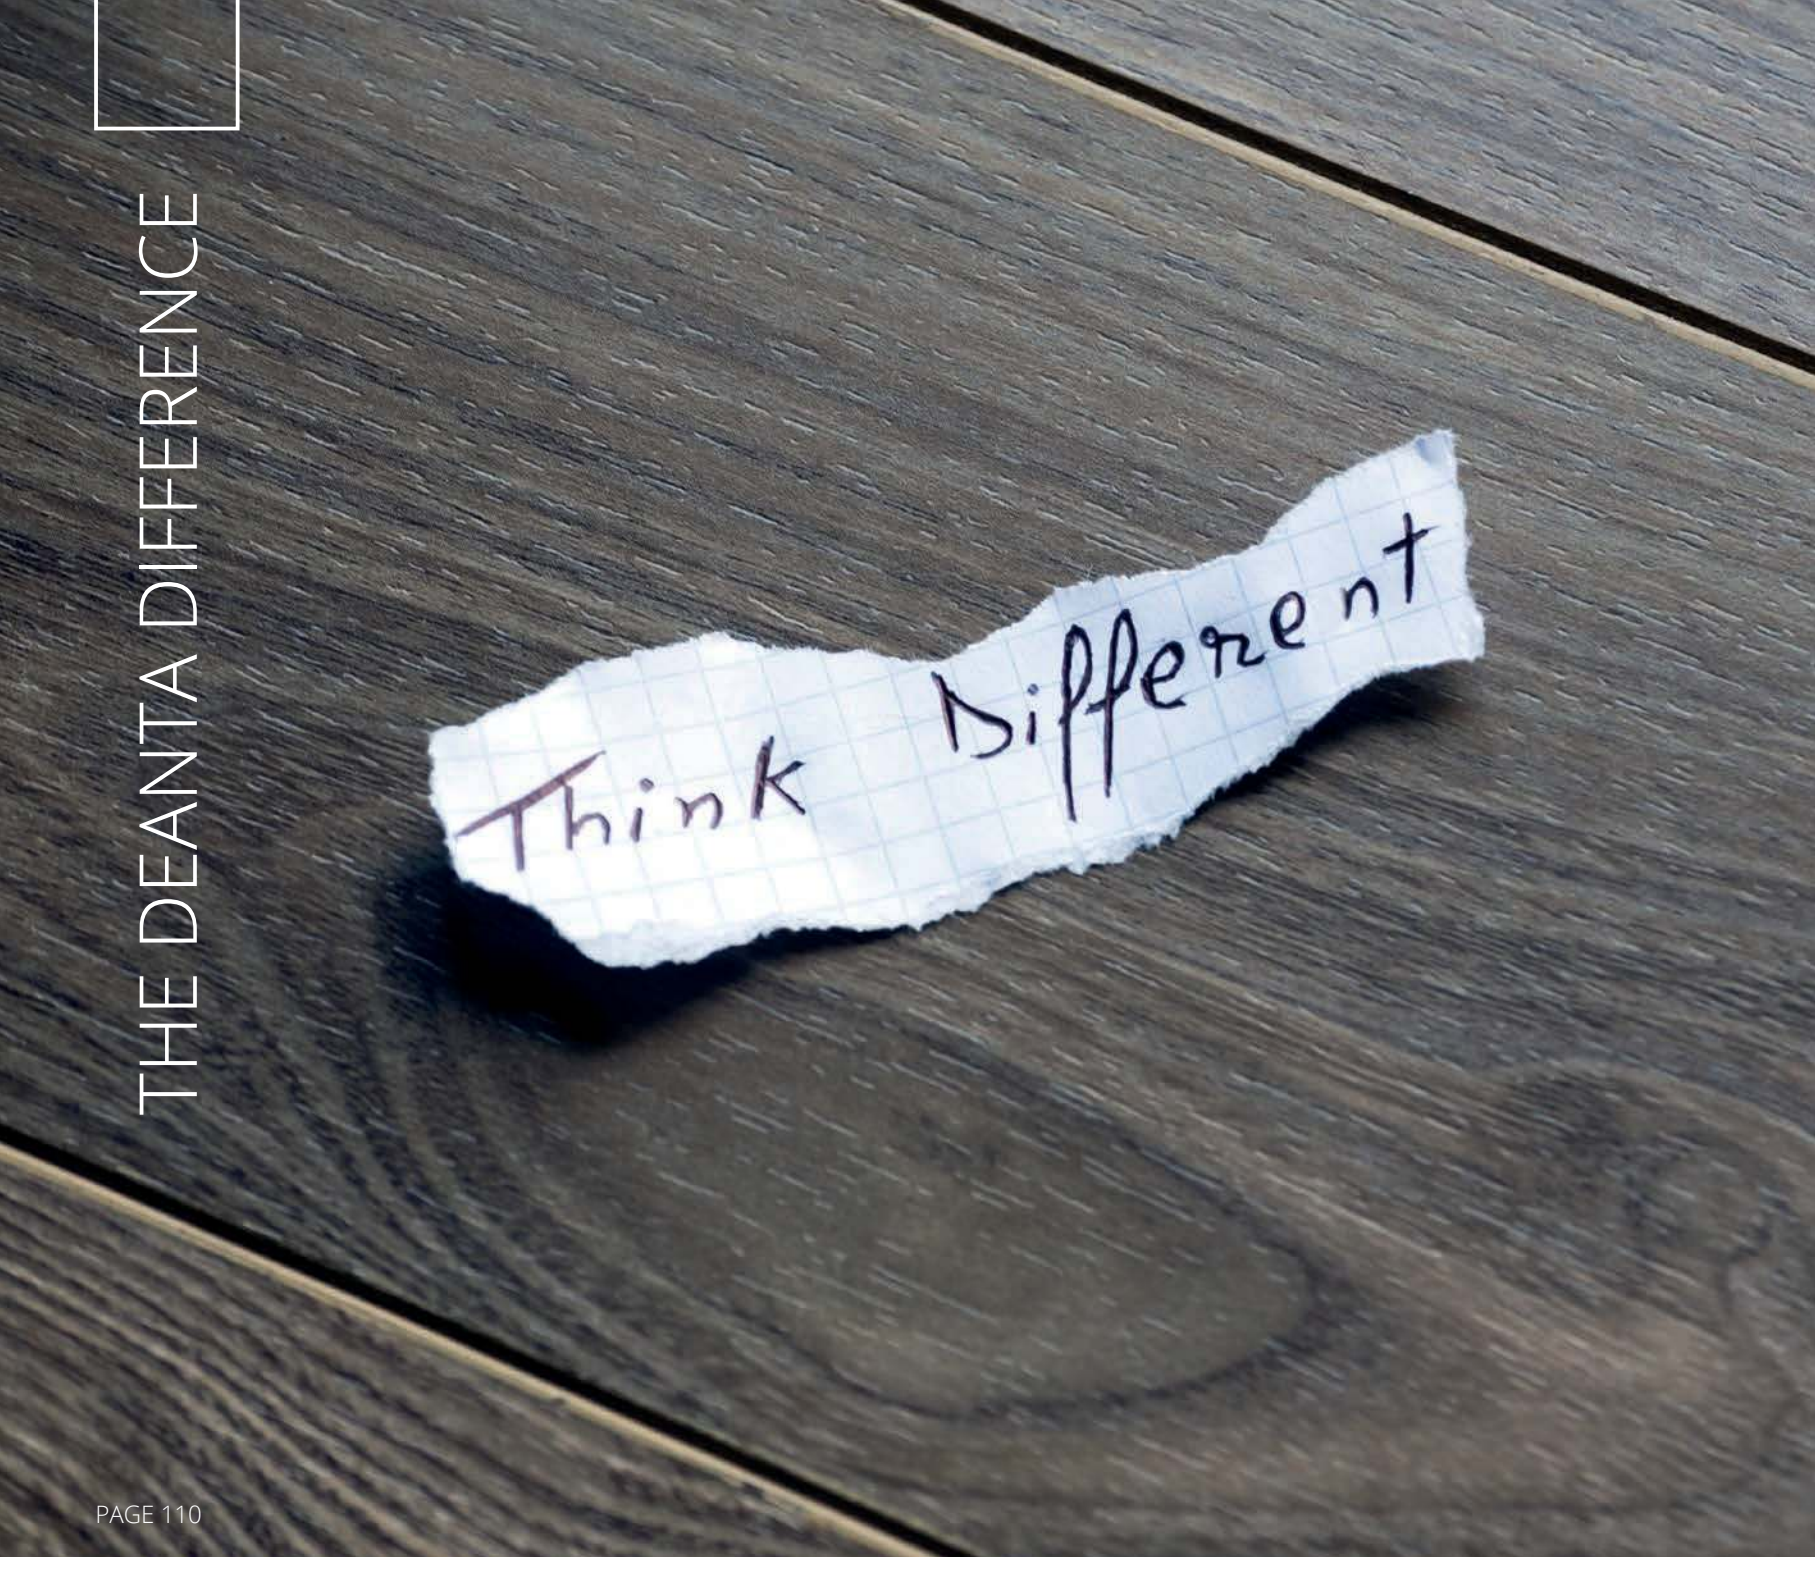
BEING RESPONSIBLE

In an age where there is continued depletion of natural resources, companies throughout the world have shifted priorities to become more environmentally aware.

At Deanta, we have realised how our operations can impact the environment so we are investing heavily to become more environmentally responsible. Throughout the business we are working to reduce our carbon footprint, helping to protect our planet and ensuring we have a positive impact on our society, economy and environment. We are always looking at ways we can reduce, reuse and recycle the resources we use.

We apply environmentally friendly practises into our office and the supply chain:

- 98% of all our onsite waste is recycled. We have recycling bins throughout the site including in our staff canteens, to make sure all Deanta employees are doing their bit for the planet.
- We have installed solar panels on the roof of our building which creates enough energy to make our building self-sustainable for seven months.
- All our timber is sourced from North American forests with sound environmental forest management schemes. These schemes ensure the forests biodiversity, productivity and ecological processes as well as protecting the rights of local people.
- We have sensor lighting and taps throughout our site to help us ensure that no power or water is wasted when not in use.
- We use mains water dispensers to reduce the use of plastic bottles and help the environment.



Think Different

THE DEANTA DIFFERENCE

With an established reputation for commitment to innovative design, unsurpassed craftsmanship and excellent client service, Deanta is committed to standing out from the crowd in the door industry.

At Deanta, we manufacture all of our doors in our very own manufacturing facility. This not only allows us to control stock supply but it also allows us to have full control of the quality control process to ensure every door that leaves our factory is of the very highest standard. We have rigorous quality control procedures in place to check every single door and we stand by this with a limited 10 Year Manufacturer Warranty on all of our doors.

Our team of highly skilled craftsmen, with the help of the latest state-of-the-art technology, achieve a perfect finish to an exceptionally high standard and lasting quality to every single door. Our team are able to offer bespoke doors to meet your exact requirements – in any size and any finish. For more information about our bespoke design service please refer to page 122.

Above all else, what truly makes us stand out from the rest is our customer care. We truly care about the experience our customers have when they deal with us. We welcome feedback and continually strive to offer unsurpassed customer care. We are a company that gives solutions, not problems.

Deanta has over twenty-five years of experience in the building and design industry which we strongly feel is fundamental in building strong, sound working relationships with our clients who are mostly door merchants – and to their customers – designers, architects and builders. That's why they keep coming back to us.

TERMS & CONDITIONS

TERMS & CONDITIONS

We offer a limited ten-year warranty on all our doors. Any Deanta door that warps* or splits will be covered by our warranty once the installation has met all guidelines.

Please note colour variance in the wood is not considered a manufacturing fault as it is a natural product.

THE FOLLOWING STEPS MUST BE CARRIED OUT TO ENSURE THE BEST PERFORMANCE FROM YOUR DEANTA DOOR.

- All doors **must be** examined immediately upon receipt and prior to being installed as claims or faults **will not** be accepted once the door has been installed or altered. This excludes manufacturing faults that occur after hanging.
- All doors must be measured individually when fitting glass. Deanta doors are a hand-assembled product, and as such, we cannot guarantee that each aperture is the exact same size. We recommend that you use a qualified glass fitter.
- Doors must be stored horizontally on a clean, dry, flat and level surface.
- Doors **must not** be fitted in a house that is freshly plastered. Doors should only be delivered to site after all wet trades are finished and the space has sufficiently dried. A moisture reading taken by an engineer **must be** recorded.
- For doors to acclimatize, they should be left in the house prior to installation **for at least 21 days** with the ambient temperature gradually increased over this period.
- Each Deanta Door has a 12mm solid wood lip along all four edges, any alteration to the width or height of the door is carried out at the discretion of the installer. Such alterations are not recommended and Deanta doors **is not** responsible for any issues arising from said work.
- Fire Doors are a certified product and **must not** be altered in any way.
- Should a door require alteration, cutting or planing, it must immediately be resealed to prevent moisture absorption which may lead to warping or splitting. Alteration of a Deanta Door will void the warranty.
- We recommend the use of three of hinges per door.
- Should a door be removed from its original packaging. It can not be returned.

UNDER OUR WARRANTY, OUR LIABILITY IS LIMITED TO REPLACING THE DOOR AND NO LIABILTY IS ACCEPTED FOR ANY CONSEQUENTIAL COSTS. ALTERATION OF A DEANTA DOOR WILL VOID THE WARRANTY.

*Warp/bow/cup/twist (as set out in the relevant Building Standards) shall not be considered a defect unless it exceeds 1/4 inch (6.35mm) in the plane of the door itself. Warp is any distortion in the door itself and does not refer to the relationship of the door to the frame or jamb in which itis hung.

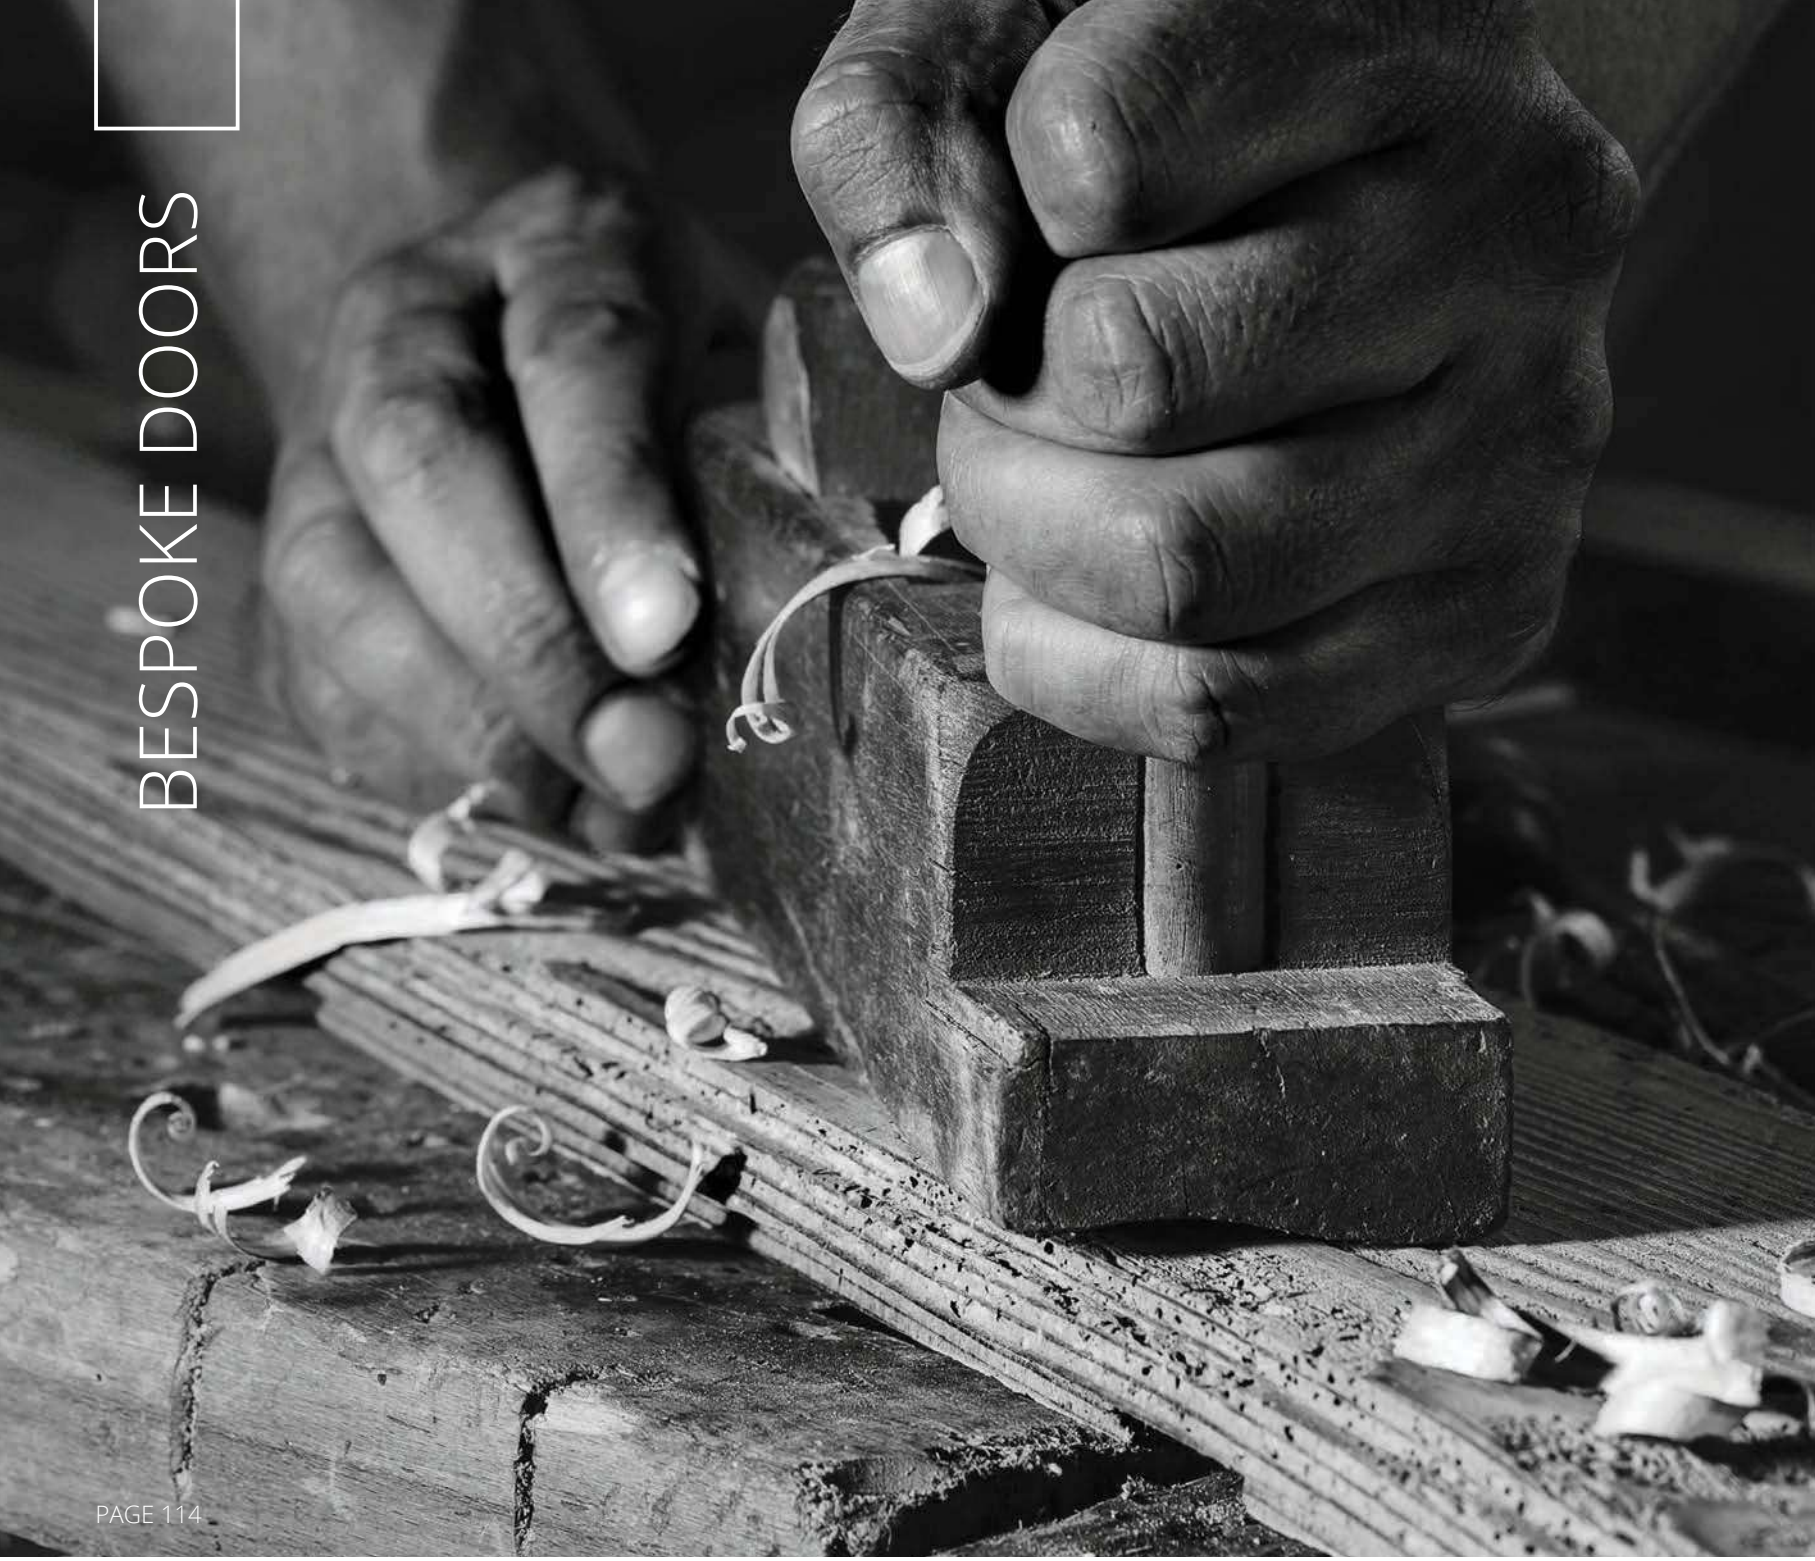
*FIRE DOOR DISCLAIMER - Doors with a fire door symbol are only available in the solid and unglazed options.

*TOUGHENED GLASS DISCLAIMER - In accordance with BS EN 12150 and BS EN 12600 we use toughened glass in all our glass doors. Toughened glass is glass that has gone through controlled thermal processes to increase its strength compared to normal glass. In the event of an abnormal impact to toughened glass, the glass shatters into small fragments instead of sharp shards making it safer and less likely to cause injury.

For more information on our warranty please visit our website at: www.deantadoors.ie.

STOCKISTS
We have a detailed list of stockists on our website. Should you wish to have your business included on this list contact your sales representative today.

BESPOKE DOORS



déanta
